

Quality, Health, Safety & Environment

Policy Statement.

Parkside is dedicated to delivering to our customers a high quality, flexible packaging product in a safe and sustainable manner.

Commitment to this Quality, Health, Safety and Environment (QHSE) policy will ensure that we provide safe and legal packaging that meet the requirements of our customers and stakeholders at all times. This policy is implemented throughout our supply chain.

Policy Objectives

- To produce and supply products and services at site that is fully compliant with all relevant legislation, industry standards and other requirements to which we subscribe. To enable this we will promote positive working relationships with authorities engaged in the enforcement of legal standards and other requirements.
- To develop QHSE awareness among all persons working for Parkside, or on behalf of Parkside by providing training, education and support to deliver continuous improvements.
- To develop close relationships with our suppliers, stakeholders and interested parties to ensure that all materials and products are consistent with achieving our QHSE standards.
- To continually improve our QHSE performance and management systems, to prevent injury or ill health while promoting wellbeing amongst our employees, preventing pollution and minimising the impacts of our activities on the environment and communities around us.
- To undertake our processes and operate the site in an environmentally efficient way by conserving energy and raw materials, reducing waste through recycling of materials where possible.
- To plan, prepare and regularly review QHSE objectives, targets and associated action plans to improve QHSE performance and to monitor and communicate our progress against plans both internal and externally.
- To promote QHSE best practice through all levels of management via actions and commitment.
- To have an inclusive policy, encouraging employee participation and consultation via various meeting and review mechanisms.

Parkside has implemented a documented hazard and risk management system (HACCP) to ensure that all hazards to product safety, quality and legality are identified and appropriate controls established, which results in a clearly defined review requirements of management systems and associated areas.

Commitment to continuous improvement of Quality, Health, Safety and Environment is demonstrated through our vision and values.

Robert Adamson
Managing Director.
